RE: Legal Notice of Intent to Approve

This letter will confirm the authorization to publish the attached NOTICE in the Salt Lake Tribune and Deseret News on May 29, 2010.

Please mail the invoice and affidavit of publication to the Utah State Department of Environmental Quality, Division of Air Quality, P.O. Box 144820, Salt Lake City, Utah 84114-4820.  
Sincerely,

Kimberly Wilcox  
Office Technician  
Utah Division of Air Quality

Enclosure

cc: Wasatch Front Regional Council  
Utah County

**NOTICE**

A Notice of Intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

**Company Name:** Sapa Extrusions Incorporated  
**Location:** Sapa Extrusions Incorporated: Unrecycled Aluminum Scrap Production – 1550 Kirby Lane, Spanish Fork, UT, Utah County  
**Project Description:** On April 20, 2010 Sapa Extrusions Inc. (Sapa) submitted a Notice of Intent (NOI) to add a second homogenizing furnace at their Spanish Fork Plant. The new furnace is identical to an existing homogenizing furnace already operating at this location. The furnace is fueled with natural gas and has a rated heat input of 30 MMBtu/hr; although the furnace will typically operate at 25% of burner capacity. This will constitute a minor modification at a minor source. National Emission Standards for Hazardous Air Pollutants for Secondary Aluminum Production apply to this source (40 CFR 63 Subpart RRR).

The Sapa plant is located in Utah County, which is a non-attainment area for PM<sub>10</sub> and PM<sub>2.5</sub>. The new furnace will increase emissions by the following amounts (all values in tons per year): PM<sub>10</sub>/PM<sub>2.5</sub> +1.0, SO<sub>2</sub> +0.1, NO<sub>x</sub> +11.2, CO +10.9, VOC +0.7 and HAPs +0.7. These increases bring the plant's total ton per year PTE to: PM<sub>10</sub>/PM<sub>2.5</sub> = 7.5, SO<sub>2</sub> = 1.4, NO<sub>x</sub> = 41.4, CO = 23.4, VOC = 2.4 and HAPs = 1.8.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 195 North 1950 West, Salt Lake City, UT 84114-4820. Written comments received by the Division at this same address on or before June 28, 2010 will be considered in making the final decision on the approval/disapproval of the proposed project. Email comments will also be accepted at [jjenks@utah.gov](mailto:jjenks@utah.gov). If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-7, UAC.

**Date of Notice: May 29, 2010**
